

— HEAT MANAGEMENT & GRILLING SYSTEM —

Heat Management Plate

The Heat Management Plate for your offset smoker is designed to drop directly into your pit just below the main cooking grate. This plate was specifically designed to draw heat and smoke evenly across the cooking surface to ensure that your food cooks evenly and consistently across the entire pit. It is made from 3/16" thick plate steel eliminating "Hot Spots" and promoting even temps through the cook chamber during the slow smoking process. ***Please specify if you have a Single or a Double Lid Smoker***

36" Cactus Burner 250,000 BTU with Propane Hose

SKU: PCB-36

Burn away your grill's greasy woes with the 36-Inch Propane Cactus Burner. Originally designed to help ranchers provide animals something to eat and drink by burning cactuses during the Texas drought from 1947 to 1956, the easy-to-hold cactus burners can reach 250,000 BTUs and are great for burning off any grease or other residue from your grill. These burners have an adjustable handle and a needle valve for comfort and ease of use. For use with Propane only.

Firebox Propane Log Lighter

SKU: PRO-PAN-LOG-LIG

Texas Original BBQ Pits LP log lighter assembly is designed to fit into the firebox on all Luling, and Pearsall backyard smokers. Designed to use with a 20# LP tank.
