

Luling Smoker Trailer

Our Luling Smoker Trailer offers all of the same features as our other offset smoker's but in our trailer model, perfect for competition, tailgating, or corporate events. Each Texas Original BBQ Smoker Trailer features a 2" steel framework, 2" tow coupler, top wind screw jack, safety chains, universal light kit, steel fenders, 3500 lbs. axle, and 15" wheels. We also outfit each smoker trailer with a firewood cage and a propane tank / water cooler holder.

We have refined the offset pit through rugged construction and superior heat management. We took everything we have learned from the competition barbeque circuit (like moving the smokestack to the end of the cooking chamber vs the top) and paired it with best-in-class engineering and construction. That knowledge is an extremely efficient pit with minimal heat loss and extremely precise airflow control that allows you to produce professional results, regardless of whether you are a trained pit master or a first timer.

All models come standard with dual dampers for airflow adjustment, 3" multi-temp zone heat gauge, grease drain, and grill grates for the firebox. All Luling smoker trailer mounted models come standard with a 2nd level shelf. Double door lids are standard on the 20" model while the 24" diameter model features triple lids for maximum cooking versatility.
